

# SJRA REHABILITATION OF BEAR BRANCH GRAVITY MAIN PROJECT

FEBRUARY 2019

## PROJECT UPDATE FEBRUARY 2019

Design of the project is nearing completion. The project will advertise for construction in mid-2019, with construction anticipated to start late-2019. Construction activities are planned to last until late-2020 with field activity beginning when the project begins construction. At that time, temporary access roads will be established, construction vehicles and heavy machinery will be present along the access routes and at the project site.
